

CHANGES/REVISIONS

1. Added process model that will be used
 - a. As per feedback, added the process model that will be used and some explanation as to why that model was chosen (this can be seen under section “Software Engineering Concepts to be Learned”).
2. Created prototype
 - a. Prototype was created and uploaded to GitHub Repository (commit message reads as “Prototype 0 Implemented”). Although extremely simplistic in design, this prototype demonstrates the various pages that are to be included in the project as well as actions that can be performed by the user.
3. Updated repository’s readme.md contents
 - a. The repo’s root “README.md” file was update with appropriate content, such as project name, issue being addressed, etc.
 - b. The code folder’s “README.md” was updated with instructions on how to get the project running on a local machine.
